COATINGS FOR USE AT HIGH TEMPERATURES

Coatings to resist high temperature corrosion

Role of platinum in aluminide coatings 1
H. M. Tawancy, N. M. Abbas (Dhahran, Saudi Arabia) and T. N. Rhys-Jones (Bristol, U.K.)

Hydrogen ion interaction behaviour of plasma-sprayed TiC coatings 8
M. S. Mathur and J. S. C. McKee (Winnipeg, Man, Canada)

Chemical vapor deposition of Si_3N_4 onto metal substrates 13
T. Taniuchi, T. Adachi and K. Kobayashi (Tokyo, Japan)

Oxidation resistance of slurry aluminides on high temperature titanium alloys 18
B. G. McMordie (Limerick, PA, U.S.A.)

Vacuum-plasma-sprayed silicon coatings 24
D. J. Varacalle, Jr. (Idaho Falls, ID, U.S.A.), H. Herman, G. A. Bancke (Stony Brook, NY, U.S.A.), T. D. Burchell and G. R. Romanoski (Oak Ridge, TN, U.S.A.)

Coatings to resist wear at high temperatures

High temperature erosion behavior of titanium nitride and zirconium nitride coatings 31
J. A. Sue and H. H. Troue (Indianapolis, IN, U.S.A.)

Laser deposition of carbide-reinforced coatings 40
W. Cerri, R. Martinella, C. P. Mor (Segrate, Italy), P. Bianchi and D. D. 'Angelo (Milano, Italy)

Thermal behaviour of thick TiC layers made by plasma spraying 46
H.-D. Steffens, M. Dvorak (Dortmund, F.R.G.) and P. Groot (Petten, The Netherlands)

Study of surface preparation for enhanced resistance to thermal shocks of plasma-sprayed TiC coatings 50
F. Bordeaux, R. G. Saint Jacques (Varennes, Que, Canada) and C. Moreau (Boucherville, Que, Canada)

Thermal barrier coatings

Laser surface sealing and strengthening of zirconia coatings 57
A. Petitbon, L. Boquet (Marcoussis, France) and D. Delsart (St.-Denis, France)

Plasma-sprayed composite coatings for high temperature applications 62
P. V. Ananthapadmanabhan, K. P. Sreekumar, K. V. Muraleedharan and N. Venkatramani (Bombay, India)

Electron-beam deposition of zirconia films stabilized in high temperature phases by different oxides 67
S. B. Qadri, E. F. Skelton, C. Kim, M. Z. Harford and P. Lubitz (Washington, DC, U.S.A.)

Corrosion resistant coatings

Thin metallic films for corrosion control 71
W. B. Nowak (Boston, MA, U.S.A.)

Corrosion characteristics of several thermal spray cermet-coating/alloy systems 78
A. A. Ashary and R. C. Tucker, Jr. (Indianapolis, IN, U.S.A.)

Niobium coatings on 316L stainless steel for improving corrosion resistance 83
J. H. Hsieh, R. Lee, R. A. Erck, G. R. Fenske (Argonne, IL, U.S.A.), Y. Y. Su, M. Marek and R. F. Hochman (Atlanta, GA, U.S.A.)

Adhesion and corrosion behavior of Al–Zn and TiN/Ti/TiN coatings on a DU–0.75wt.%Ti alloy 87
F. C. Chang, M. Levy, R. Huie, M. Kane, P. Buckley (Watertown, MA, U.S.A.), T. Z. Kattamis (Storrs, CT, U.S.A.) and G. R. Lakshminarayan (Arsenal, NJ, U.S.A.)

Ceramic coating for valve seats and stems by plasma chemical vapor deposition 97
T. Yoshioka, H. Ukegawa, H. Kawai, N. Fujita and T. Igarashi (Itami, Japan)

Silicon coatings on copper by chemical vapor deposition in fluidized bed reactors 103
A. Sanjurjo, B. J. Wood, K. H. Lau, G. T. Tong, D. K. Choi, M. C. H. McKubre, H. K. Song (Menlo Park, CA, U.S.A.) D. Peters and N. Church (New York, NY, U.S.A.)

Titanium-based coatings on copper by chemical vapor deposition in fluidized bed reactors 110
A. Sanjurjo, B. J. Wood, K. H. Lau, G. T. Tong, D. K. Choi, M. C. H. McKubre, H. K. Song (Menlo Park, CA, U.S.A.) and N. Church (New York, NY, U.S.A.)

Titanium-based coatings on steel: dip coating and plasma spray 116
J. Chen, G. Craig, E. Farley and A. Sanjurjo (Menlo Park, CA, U.S.A.)

HARD COATINGS AND DEPOSITION TECHNOLOGIES

PVD technology I: Plasma and magnetic field characterization

Modeling magnetic fields of magnetron sputtering systems 121
M. S. Wong, W. D. Sproul and S. L. Rohde (Evanston, IL, U.S.A.)

Investigation of partial reactions during magnetron sputtering of TiN coatings by *in situ* Auger electron spectroscopy analysis and plasma diagnostics 127
N. Eguchi, V. Grajewski, H. H. Uchida and E. Fromm (Stuttgart, F.R.G.)

The practical use and application of Monte-Carlo studies in physical vapour deposition technology 132
R. Elsing (Aachen, F.R.G.)

PVD technology II: Alternative methods

Structural and magnetic properties of Al/Fe multilayers deposited by ion beam sputtering 139
S. B. Qadri, C. Kim, M. Twigg, M. Z. Harford and P. Lubitz (Washington, DC, U.S.A.)

Structural, elastic and transport properties of Ag/Al multilayer thin films prepared by ion-beam sputtering 143
C. Kim, S. B. Qadri, T. M. Tritt, A. C. Ehrlich, S. M. Hues, R. L. Jacobsen (Washington, DC, U.S.A.), S. Kumar and M. Grimsditch (Argonne, IL, U.S.A.)

Titanium nitride coatings obtained using new apparatus for ion beam assisted deposition 150
M. Bonelli, L. Calliari, M. Fl[illegible], M. A. Ghabashy, L. A. Guzman, A. Miotello (Trento, Italy) and P. M. Ossi (Milano, Italy)

Reactive co-sputtering of oxid[illegible]d nitrides using a C–Mag[tm] rotatable cylindrical cathode 155
A. Belkind, W. Gerristead, Z. Orban (Murray Hill, NJ, U.S.A.), D. Dow, J. Felts and R. Laird (Concord, CA, U.S.A.)

A new concept for physical vapor deposition coating combining the methods of arc evaporation and unbalanced-magnetron sputtering 161
W.-D. Münz, F. J. M. Hauzer, D. Schulze and B. Buil (Venlo, The Netherlands)

Adherent metallization of plastic composites 168
D. Mann, J. Fessmann, G. Kampschulte (Stuttgart, F.R.G.) and M. Hopkins (Boulder, CO, U.S.A.)

CVD I: Silicon carbide and silicon nitride

Investigation of interfaces of chemically vapour deposited SiC, SiC–Ti(N,C) multilayer coatings on WC–Co based cermets 174
G. Giunta, M. Fiorini, V. Vittori (Rome, Italy) and G. Marchesano (Siano, Italy)

PVD properties I: Micro and nano structure

On picostructural models of physically vapor-deposited films of titanium nitride 181
V. Valvoda (Prague, Czechoslovakia), A. J. Perry (Boulder, CO, U.S.A.), L. Hultman (Linköping, Sweden), J. Musil and S. Kadlec (Prague, Czechoslovakia)

A study of the picostructure of sputtered ZrN films 188
A. J. Perry (Boulder, CO, U.S.A.), J. P. Schaffer (Easton, PA, U.S.A.), J. Brunner (Zurich, Switzerland) and W. D. Sproul (Evanston, IL, U.S.A.)

Deposition of and annealing effect on Ti(C,N) coatings 194
M. Tamura and H. Kubo (Kanagawa, Japan)

Thermal relief of stresses in sputtered refractory metals and compounds 199
B. Window, M. V. Swain and G. L. Harding (Sydney, N.S.W., Australia)

A study of TiN coatings on a low alloy high speed steel 203
P. Ding, Z. Ni, S. Zhou and F. Pan (Chongqing, China)

CVD II: Deposition methods

Thermodynamic analysis and deposition of refractory materials 208
C. Bernard and R. Madar (St. Martin d'Hères, France)

Chemical vapor deposition of fine-grained equiaxed tungsten films 215
D. W. Woodruff and J. M. Redwing (Schenectady, NY, U.S.A.)

Laser-assisted chemical vapor deposition of hard and refractory binary compounds 221
M. Boman and J.-O. Carlsson (Uppsala, Sweden)

Coating particles by chemical vapor deposition in fluidized bed reactors 228
B. J. Wood, A. Sanjurjo, G. T. Tong and S. E. Swider (Menlo Park, CA, U. S.A.)

Applications and trends in plasma-enhanced organometallic chemical vapour deposition 233
H. Suhr (Tübingen, F.R.G.)

PVD technology III: Cathodic arc methods

Deposition of TiN, TiC, and TiO_2 films by filtered arc evaporation 239
P. J. Martin, R. P. Netterfield, T. J. Kinder (Sydney, N.S.W., Australia) and L. Descôtes (Paris, France)

Fundamental studies of the steered arc technique 244
M. Ives, J. S. Brooks, J. Cawley (Sheffield, U. K.) and W. Burgmer (Bergisch Gladbach, F.R.G.)

A study of the macroparticle distribution in cathodic-arc-evaporated TiN films 253
A. W. Baouchi and A. J. Perry (Boulder, CO, U.S.A.)

Improved control of TiN coating properties using cathodic arc evaporation with a pulsed bias 258
W. Olbrich, J. Fessmann, G. Kampschulte (Stuttgart, F.R.G.) and J. Ebberink (Sigmaringen-Laiz, F.R.G.)

Ceramic cathodes for arc-physical vapour deposition: development and application 263
O. Knotek, F. Löffler, M. Böhmer, R. Breidenbach and C. Stößel (Aachen, F.R.G.)

CVD III: Titanium carbide and titanium nitride

New developments in chemically vapour-deposited coatings from an industrial point of view 268
E. Kübel (Münsingen, F.R.G.)

Design and chemical vapor deposition of graded TiN/TiC coatings 275
S. Eroglu and B. Gallois (Hoboken, NJ, U.S.A.)

TiN film formation by plasma chemical vapor deposition and its plasma diagnostics 279
Y. Ishii, H. Ohtsu, T. Adachi, H. Ichimura and K. Kobayashi (Tokyo, Japan)

PVD technology IV: Sputter deposition

Multi-cathode unbalanced magnetron sputtering systems 284
W. D. Sproul (Evanston, IL, U.S.A.)

Low pressure magnetron sputtering using ionized, sputtered species 290
W. Posadowski (Wrocław, Poland)

High rate reactive sputtering of MoN_x coatings 293
P. J. Rudnik, M. E. Graham and W. D. Sproul (Evanston, IL, U.S.A.)

Deposition of thick films of oxygen-free high conductivity copper by unbalanced d.c. magnetron sputtering: self-biased and biased conditions 298
D. Monaghan and R. D. Arnell (Salford, U.K.)

Preparation of ultrafine Cu and SnO_2 particles by d.c. magnetron sputtering 304
T.-G. Suh, D. M. Umarjee, S. Prakash, H. J. Doerr, C. V. Deshpandey and R. F. Bunshah (Los Angeles, CA, U.S.A.)

Morphology and thickness distribution of sputtered W–C–Co films deposited on differently shaped substrates 311
A. Cavaleiro and M. T. Vieira (Coimbra, Portugal)

PVD technology V: Applied technology

Physically vapor deposited coatings on tools: performance and wear phenomena 316
W. König, R. Fritsch and D. Kammermeier (Aachen, F.R.G.)

Arc-deposited Ti–Zr–N coatings on cemented carbides for use in interrupted cutting 325
O. Knotek, F. Löffler and G. Krämer (Aachen, F.R.G.)

Novel low temperature hard coatings for large parts 330
D. Hofmann, S. Beißwenger and A. Feuerstein (Hanau, F.R.G.)

PVD properties II: Micromechanical and corrosion

Effect of contamination reactions on the composition and mechanical properties of magnetron sputtered TiN coatings 336
S. Berg, N. Eguchi, V. Grajewski, S. W. Kim and E. Fromm (Stuttgart, F.R.G.)

Mechanical properties of TiN films deposited by changed-pressure r.f. sputtering 342
Y. Kubo and M. Hashimoto (Kawasaki, Japan)

Selective steam oxidation of titanium and aluminium in TiN and (Ti,Al)N physically vapour-deposited coatings on dental surgical tools 348
C. W. Louw, I. LeR. Strydom, K. van den Heever and M. J. van Staden (Pretoria, South Africa)

Identification of factors affecting the aqueous corrosion properties of (Ti,Al)N-coated steel 353
J. Aromaa, H. Ronkainen, A. Mahiout and S.-P. Hannula (Espoo, Finland)

DIAMOND AND RELATED MATERIALS

Industrial applications of diamond and related materials

Mechanical applications of thin and thick diamond films 359
M. Murakawa and S. Takeuchi (Saitama, Japan)

Effects of surface treatment on the diamond deposition and performance of ceramic cutting tools 366
C. L. Chang and M. P. Guidoboni (Northboro, MA, U.S.A.)

Amorphous carbon physically vapour deposited coatings 370
O. Knotek, F. Löffler, J. Brand (Aachen, F.R.G.) and W. Burgmer (Bergisch-Gladbach, F.R.G.)

Synthesis and characterization of diamond and related materials

Fabrication of diamond films under high density helium plasma formed by electron cyclotron resonance 374
M. Yuasa (Nara, Japan), H. Kawarada (Tokyo, Japan), J. Wei, J. S. Ma (Osaka, Japan), J. Suzuki, S. Okada (Kyoto, Japan) and A. Hiraki (Osaka, Japan)

Real time monitoring of filament-assisted chemically vapor deposited diamond by spectroscopic ellipsometry 381
Y. Cong, I. An, H. V. Nguyen, K. Vedam, R. Messier and R. W. Collins (University Park, PA, U.S.A.)

Plasma enhanced chemical vapor deposition modeling 387
E. Hyman, K. Tsang, I. Lottati, A. Drobot (McLean, VA, U.S.A.), B. Lane, R. Post and H. Sawin (Woburn, MA, U.S.A.)

Raman observation of diamond phase carbon films prepared by ionized deposition 394
E. Heidarpour and Y. Namba (Tokyo, Japan)

Effect of temperature on the deposition rate and properties of hydrogenated amorphous carbon films 399
P. Wood, T. Wydeven (Sunnyvale, CA, U.S.A.) and O. Tsuji (Kyoto, Japan)

Synthesis and applications of cubic boron nitride

Tribological properties of cubic, amorphous and hexagonal boron nitride films 406
S. Watanabe, S. Miyake and M. Murakawa (Saitama, Japan)

Magnetron sputter deposition of boron and boron carbide 411
M. A. McKernan (Livermore, CA, U.S.A.)

Plasma deposition of cubic boron nitride films from non-toxic material at low temperatures 416
M. Z. Karim, D. C. Cameron, M. J. Murphy and M. S. J. Hashmi (Dublin, Ireland)

Preparation of cubic boron nitride films by plasma-enhanced chemical vapour deposition of BF_3, N_2 and H_2 gas mixtures 422
J. M. Mendez, S. Muhl (Mexico, Mexico), M. Farias, G. Soto and L. Cota-Araiza (Baja California, Mexico)

TRIBOLOGICAL COATINGS/SURFACE MODIFICATIONS

Reduction of friction through coatings/surface modifications

Interpretation of friction and wear of ceramics in terms of surface analysis 427
J. M. Martin and Th. le Mogne (Ecully, France)

Relationship of hertzian contact pressure to friction behavior of self-lubricating boric acid films 435
A. Erdemir, R. A. Erck (Argonne, IL, U.S.A.) and J. Robles (Davis, CA, U.S.A.)

Ion implantation effects in pulsed laser deposited tungsten carbide films 439
B. G. Wagh, V. P. Godbole and S. B. Ogale (Pune, India)

Forces, surface finish and friction characteristics in surface engineered single- and multiple-point cutting edges 443
M. Sarwar, D. Gillibrand and S. R. Bradbury (Sheffield, U.K.)

Wear resistance of ceramic metallic-, and composite coatings

Abrasion resistance of various thin film coatings on thick film resistor materials 451
H.-J. Krokoszinski (Heidelberg, F.R.G.)

Mechanical properties and wear resistance of ion-beam-assisted sputter-deposited NiT(N) coatings 457
K. Bouslykhane, P. Moine, J. P. Villain and J. Grilhé (Poitiers, France)

Adhesion improvements in silicon carbide deposited by plasma enhanced chemical vapour deposition 462
V. A. Mernagh, T. C. Kelly, M. Ahern, A. D. Kennedy (Dublin, Ireland), A. P. M. Adriaansen, P. P. J. Ramaekers (Eindhoven, The Netherlands), L. McDonnell (Cork, Ireland) and R. Koekoek (Hoogeveen, The Netherlands)

Evaluation of some titanium-based ceramic coatings on high speed steel cutting tools 468
H. Ronkainen, I. Nieminen, K. Holmberg (Espoo, Finland), A. Leyland, A. Matthews (Hull, U.K.), B. Matthes and E. Broszeit (Darmstadt, F.R.G.)

Coating resistance to erosion, corrosion, and severe environments

A thermochemical model for analyzing low wear-rate materials 474
I. L. Singer (Washington, DC, U.S.A.)

Erosion protection of carbon-epoxy composites by plasma-sprayed coatings 482
F. Alonso, I. Fagoaga and P. Oregui (San Sebastián, Spain)

Corrosion performance of some titanium-based hard coatings 489
B. Matthes, E. Broszeit (Darmstadt, F.R.G.), J. Aromaa, H. Ronkainen, S.-P. Hannula (Espoo, Finland), A. Leyland and A. Matthews (Hull, U.K.)

Effect of the surface roughness of substrates on the corrosion properties of films coated by physical vapour deposition 496
J. Munemasa and T. Kumakiri (Hyogo, Japan)

Noble metal implantation to reduce hydrogen embrittlement in steels 500
P. Buckley, B. Placzankis, L. Lowder (Watertown, MA, U.S.A.), I. G. Brown (Berkeley, CA, U.S.A.) and R. Brown (Watertown, MA, U.S.A.)

Analysis and micromechanical testing of tribological coatings

Modelling the contact response of coated systems 504
P. M. Ramsey, H. W. Chandler and T. F. Page (Newcastle-upon-Tyne, U.K.)

Ultramicrohardness and microstructure of Ti–6wt.%Al–4wt.%V alloy nitrided by ion implantation 510
V. C. Nath, D. K. Sood and R. R. Manory (Melbourne, Vic., Australia)

Mechanical stability and adhesion of ceramic coatings deposited on steels 514
M. Ignat (St. Martin d'Hères, France), A. Armann, L. Moberg (Stockholm, Sweden) and F. Sibieude (Font-Romeu, France)

Thermal instability of the microstructure and surface mechanical properties of hydrogenated amorphous carbon films 519
J. C. Knight, T. F. Page and H. W. Chandler (Newcastle-upon-Tyne, U. K.)

Tribological properties of diamond, diamond-like and c-BN coatings

Tribological behavior of diamond-like carbon: effects of preparation conditions and annealing 530
A. Grill, V. Patel and B. Meyerson (Yorktown Heights, NY, U.S.A.)

The effects of oxygen and humidity on friction and wear of diamond-like carbon films 537
D. S. Kim, T. E. Fischer and B. Gallois (Hoboken, NJ, U.S.A.)

Microstructure and wear behavior of metal-containing diamond-like coatings 543
H. Dimigen and C.-P. Klages (Hamburg, F.R.G.)

Deposition of hydrogenated B–C thin films and their mechanical and chemical characterization 548
J. I. Oñate, A. García, V. Bellido and J. L. Viviente (San Sebastián, Spain)

Friction and wear properties of diamonds and diamond coatings 554
I. P. Hayward (Fort Washington, MD, U.S.A.)
